

“The Campbelltown centre will be of benefit to our kids and families for years to come”

– Dr Simon Greenberg,
Ear Nose and Throat Surgeon
based in Campbelltown.

The expansion of services to our area will alleviate some of these pressures for the families in our community, and increase access to services which will help these kids reach their full potential.

“It really is great news for the local community that The Shepherd Centre will expand into Campbelltown.

When a child is diagnosed with a serious hearing problem, it can be an incredibly stressful time for parents, and the added pressure of travel and time off work to commute back and forward to appointments in the city can make it an impossible situation for many.

The expansion of services to our area will alleviate some of these pressures for the families in our community, and increase access to services which will help these kids reach their full potential.”
